3M™ Scotchcal™ Graphic Film for Textured Surfaces IJ8624

Textured Surfaces

can now provide freedom
to create on an impressive scale

Reliable adhesion turns indoor and outdoor textured surfaces into prime selling space

- Cast film conformability and optimal print quality
- Conformable and dimensionally stable overlaminate
- Excellent hiding power
- Removable with heat

3M

3M™ Scotchcal™ Graphic Film for Textured Surfaces IJ8624

Until now, many textured surfaces have been off-limits for graphics because there hasn't been a film that sticks well on them. But Scotchcal Graphic Film for Textured Surfaces IJ8624 and 3M™ Scotchcal™ Luster Overlaminates 8524 are changing that. This unique, conformable graphic construction can be moulded to rough surfaces to create crisp, photographic quality images that inform, promote and advertise.

Key Features

- Excellent adhesion to moderately textured surfaces when using the 3M patent pending installation procedure
- Specialised tools and proven techniques for efficient and effective application
- Film is removable with heat
- Grey adhesive on film IJ8624 will hide almost any wall colour
- Cast film IJ8624 for conformability and optimal print quality
- Equally conformable, compatible overlaminates
- Designed for solvent based piezo inkjet printing

- Create photographic quality images in any size, shape or design
- Fast, clean and generally more cost effective compared to painted graphics
- Reliable adhesion turns indoor and outdoor textured surfaces into prime real estate

New installation tools and methods

3M's new installation tools and patent pending methods provide fast, easy applications.
